

Attachment 1:	Job Description
Title of Position:	Research officer – Qualitative Research
Date of Job Description	7 th March 2024
Reporting to:	Senior Research Advisor
Job Summary: As a Qualitative Research Officer, you will be responsible for designing, implementing, and analyzing qualitative research studies. You will collaborate with cross-functional teams, collect data through interviews, focus groups, and observations, and synthesize findings into reports and actionable recommendations. You will work closely with both our internal research team and external stakeholders to provide insights that inform policies, programs, and strategic decisions.	
Key Responsibilities: This role involves the entire research process from design to dissemination of study findings. This will include developing research protocols related to sexual and reproductive health, designing suitable qualitative methodologies, conducting fieldwork, and analyzing data with software like Dedoose, NVivo, or MAXQDA to uncover patterns and insights. Additionally, the incumbent will be responsible for compiling study reports and presentations and working with teams to merge and triangulate qualitative and quantitative findings. Further, the officer will be responsible for engaging with various stakeholders to share results and receive feedback as well as dissemination of research findings through conferences, publications, and webinars. The officer will also contribute to writing research proposals, seeking funding, and staying updated on research methods and ethics through continuous professional development. Other key responsibilities include ensuring adherence to data handling, confidentiality, and quality control.	
Qualitative Research Design, data collection, analysis and dissemination	
✓ Develop research protocols, proposing appropriate methodologies such as interviews, focus groups, and ethnography while adhering to ethical research practices. ✓ Support the design and pre-testing of data collection tools ✓ Train, supervise, and offer technical assistance to research assistants on qualitative data collection techniques ✓ Guide research assistants through the process of contacting/identifying/recruiting research participants, screening for eligibility, obtaining informed consent, and employing proper data handling techniques. ✓ Lead the transcription, translation, and analysis of qualitative data. ✓ Participate in recruiting and supervising data collectors and enumerators across various counties, ensuring adherence to study protocols. ✓ Utilize software Dedoose, NVivo, or MAXQDA to analyze qualitative data ✓ Prepare and disseminate study findings through comprehensive research reports, manuscripts, webinars, and presentations to various audiences ✓ Engage with stakeholders, including community members and policymakers, to share findings and gather feedback. ✓ Ensure safe transmission, storage, and archiving of qualitative data and scripts	
Coordination of project/study activities	
✓ Coordinate day-to-day project activities, establishing and maintaining a project work plan. ✓ Supervise data collection in study areas, ensuring smooth operation and adherence to the	

research design. ✓ Prepare for and support the training of data collectors, including organizing logistics and preparing training materials.
Quality assurance ✓ Ensure the preparation of necessary documents for ethics approval applications and maintain a regulatory binder with approved study documents. ✓ Perform regular reviews of the regulatory binder to ensure all research certificates and Good Clinical Practice (GCP) certificates are valid and up to date. ✓ Ensure that all study documents are handled and stored according to data handling and protection guidelines, maintaining the integrity and confidentiality of the data.
Proposal Development ✓ Contribute to the development of research proposals and funding applications to secure funding for future research projects, ensuring the inclusion of qualitative research components and ethical considerations.
Essential Requirements ✓ At least a Bachelor's degree in - medical anthropology, medical sociology, public health, or a related field. A Master degree will be an added advantage ✓ 3+ years' experience in public health research especially on areas related to sexual reproductive health ✓ 3+ years conducting in-depth and key informant interviews, focus group discussions, and participant observation ✓ Verifiable experience in conducting qualitative data analysis using nVIVO, Dedoose or MAXQDA or other related qualitative software ✓ Experience coordinating studies and supervising field research assistants ✓ Strong organizational, and problem-solving skills ✓ Strong interpersonal skills and a team player. ✓ Excellent written, verbal, and visual communication skills are required. ✓ Strong organizational skills, with the capability to manage multiple projects simultaneously and meet tight deadlines.
