

Terms of Reference for ICRHK Website Redesign Consultancy

Introduction

The International Centre for Reproductive Health – Kenya (ICRHK) seeks a qualified web design consultant/consultant firm to redesign its website to reflect over 25 years of leadership in sexual and reproductive health and rights (SRHR).

The redesigned site should:

- Highlight our journey, achievements and impact
- Improve access to research, publications and program details
- Use a flexible CMS to manage videos, images, audios and documents
- Be intuitive, mobile-friendly and fully accessible across devices preferably in WordPress

Objectives of the website redesign

The new website should:

- Refresh ICRHK's digital presence with a modern, user-friendly design
- Increase visibility of our work and research outputs
- Offer easy access to information for donors, media, partners and the public
- Boost user engagement through clear calls to action (e.g. donate, sign up, blogs, job application, apply, media releases, downloads, link to social media)
- Be responsive, secure and inclusive to all users including those with disabilities

Design Requirements

The site must:

- Look modern and human centred – warm design, authentic photos, vibrant colours
- Be easy to navigate – clean menus, simplified language, accessible staff profiles
- Showcase impact – use videos, infographics, testimonials and filterable resources
- Build credibility – include logos, media kits and optimize for SEO
- Encourage action – clear engagement prompts and accessible tools

Deliverables

- Inception Report – approach, timeline and resource needs
- Design Prototypes – homepage and key templates for review
- Functional Website – fully developed site with agreed features
- User Guide & Training – instructions and training for ICRHK staff
- Maintenance Plan – three (3) month post-launch support

Qualifications and Experience

1. At least 5 years of web design experience with mobile-first, user-friendly sites
2. Expertise in WordPress, CMS customization and web technologies (HTML5, CSS3, JavaScript, PHP, MySQL)
3. SEO and performance optimization knowledge

4. Ability to integrate tools like DHIS2 or geographic data tools and other GIS presentations
5. A strong portfolio for similar work with NGOs or health/research institutions
6. Effective communication and training skills

Timeframe

The full project must be completed within 30 days of contract signing

Submission Requirements

- A technical proposal (approach, tools, methodology)
- An itemized financial proposal
- Team member CVs
- Portfolio of similar work done in the last 3 years
- Contact details of three referees

Consultancy Fees

The Consultant shall be paid an agreed amount for the consultancy less 5% withholding tax on consultancy at the end of the agreed consultancy period.
