

WISDOM SHEM ODAWA

STATISTICIAN/ DATA ANALYST/ DATA SCIENTIST

P.O BOX 62000- 0020, NRB. Kenya.

 **+254741282300**

 **wisdomodawa5@gmail.com**

SUMMARY

Statistics graduate with strong hands-on experience in data collection, analysis, and stakeholder engagement across academic, government, and private-sector projects. Proficient in data visualization and reporting using Power BI and Excel, with practical exposure to field research, survey administration, and data quality assurance. Demonstrated ability to translate data into actionable insights while supporting research objectives, business development, and evidence-based decision-making.

EDUCATION

Science and Statistics | Jomo Kenyatta University of Agriculture and Technology

SEPTEMBER 2021 – MAY 2025

Statistical Analysis and Inference.

Data collection and Cleaning.

Statistical Software(R, SPSS, Excel).

Research and Report writing.

Hypothesis Testing and Experimental Design.

CERTIFICATIONS AND TRAINING | Bounty Analytica

OCTOBER 2023 – DECEMBER 2024

Advanced Excel

Mastered Functions in Excel, and advanced formulas and developed skills in creating dynamic dashboards and interactive pivot tables to track key business metrics. Utilized Power Query for data cleaning and transformation, improving data accuracy.

Stata

Gained proficiency in data cleaning, descriptive statistics, regression analysis and econometrics application

SPSS

Mastered statistical analysis of survey and experimental data and hypothesis testing

Tableau

Created interactive dashboards and visual data insights

Power BI

Gained proficiency in power BI Desktop including data import, transformation and visualization. Automated data workflows between Excel and Power BI, integrating data sources and Refreshing reports dynamically.

EXPERIENCE

Campus Market Lead | Bounty Analytica

JUNE 2023 – MAY 2025

1. Promoted and marketed data science products and events to over 500+ university students, resulting in a 30% increase in student sign-ups in five academic terms.
2. 2. Organized and hosted at least 5 on-campus data science events, boosting student engagement and awareness of data-driven career opportunities and student engagement.
3. 3. Collaborated with clients and internal teams on research initiatives, assisting in field data collection , data validation and preliminary analysis to deliver actionable insights aligned with project goals.
4. Supported stakeholder on-boarding and client engagement activities through presentations, Follow-ups and feedback collection.

Research Assistant | Kenya National Bureau of Statistics

JUNE 2024 – AUGUST 2024

1. Collected and verified education data during the 2024 School Census, ensuring completeness, accuracy, and compliance with national data collection protocols.
2. Maintained high data quality standards through careful validation and adherence to reporting guidelines.
3. Supported timely submission of clean datasets for national education planning and policy analysis

Research Assistant | Metropol

MAY 2023 – JULY 2023

1. Collected and validated data from 100+ SMEs, achieving 98% accuracy in data reporting used for business credit risk profiling.
2. Conducted structured interviews with business owners, leading to comprehensive insights on financial practices and bottlenecks.
3. Maintained data integrity and streamlined data entry process, reducing data entry time by 20% through process optimization and better data management practices.

Research Assistant and Data Entry Agent | Njoo Dada

APRIL 2023 – MAY 2024

1. I adhered strictly to survey and interview protocols during field data collection to maintain consistency and data integrity. I demonstrated strong attention to detail and compliance with standard operating procedures, contributing to high-quality datasets that supported reliable research outcomes.
2. Contributed to the production of reliable datasets used for downstream research and reporting.
3. I consistently followed detailed instructions to input and manage large volumes of information with precision, ensuring data accuracy and confidentiality and compliance with SOPs.

SKILLS

1. **Data Collection, Cleaning & Transformation** – Field surveys, data cleaning, handling missing values, and preparing analysis-ready datasets.
2. **Data Quality Assessment & Validation** – Accuracy checks, consistency reviews, and adherence to data collection protocols.
3. **Statistical Analysis** – Descriptive and basic inferential analysis for research and decision-making.
4. **Data Visualization (Power BI, Excel)** – Dashboards, charts, pivot tables, and interactive reports.
5. **ETL Processes** – Extracting, transforming, and loading data into Excel and Power BI.
6. **Market Research & Analysis** – Market surveys, competitor analysis, and trend identification.
7. **Report Writing & Data Presentation** – Clear analytical reports, summaries, and stakeholder-ready presentations.
8. **Stakeholder Engagement** – Client interaction, feedback collection, and research support.
9. **Communication & Presentation Skills** – Clear written and verbal communication in professional settings.

PROJECTS.

Title: Comparative Machine Learning Approaches for Breast Cancer Diagnosis: Enhancing Predictive Accuracy and Tumor Classification

Duration: September 2024- May 2025

1. Developed and evaluated machine learning classification models to predict breast cancer diagnosis using structured clinical and diagnostic data.
2. Performed data cleaning, pre-processing and feature selection, including handling missing values, normalization, and exploratory data analysis
3. Implemented and compared multiple models such as logistic regression, decision trees, random forest and support vector machines.
4. Assessed model performance using accuracy, precision, recall, F1-score, ROC-AUC and confusion matrices to ensure robust evaluation.
5. Optimized model performance through hyper-parameter tuning and cross validation improving predictive reliability.

Key achievement: Built a reliable predictive model for breast cancer diagnosis, demonstrating the practical application of machine learning to support early detection and evidence based health care decision making

Title: Times series modelling of tourist arrival and tourism income in Kenya.

Duration: May 2024-September2024

1. Analyzed monthly tourist arrival and tourism income data to identify long-term trends, seasonality, and structural shocks
2. Built and compared ARIMA and double exponential smoothing models using R to forecast tourism performance
3. Conducted stationarity testing, time series decomposition and model diagnostics
4. Evaluated model accuracy using AIC, BIC, MAE, RMSE and MAPE selecting optimal models for forecasting
5. Produced a five year forecast to inform tourism planning, resilience strategies and revenue optimization.
